ABSTRACT

This study aims to analyze the application of risk management to "Kredit Usaha Rakyat" on Bank X in Bengkulu Province to minimize credit risk. This study using qualitative research with descriptive method based on the case study of risk management applied in Bank X to the "Kredit Usaha Rakyat" program. Data collection was carried out by interviewing the entity's officer and by collecting and analyzing secondary data such as annual report and applicable regulation. Based on analysis using COSO ERM framework, concluded that Bank X has implemented an effective risk management. This study contributes to the field of risk management of banking industry which provide business credit for Micro, Small, and Medium Enterprise (MSME).

INTRODUCTION

With the magnitude The contribution of Micro , Small and Medium Enterprises (MSMEs) reached 60.51% of GDP and absorbs 96.92% of energy work , the Indonesian government is implementing a financing program credit in form People's Business Credit which has been launched in the month November 2007.

Government emit Coordinating Ministerial Regulation 7 of 2024 which regulates policy People's Business Credit post Covid-19 pandemic . In implementation , government play a role as guarantor , while Banking become source main from funding and distribution of KUR based on Bank functions are stated in Law No. 10 of 1998. Bank X is a bank which is one of the... KUR distributor in Bengkulu. Bank X provides offer on various type credit , Micro KUR (ceiling) with maximum Rp. 100 million) and Small KUR (ceiling with maximum Rp. 500 million). Giving loan bring up risk credit traffic jam , where the more the high amount of funds disbursed , then potential failure payments that give rise to credit problematic (*non-performing loan*) will increase in a way simultaneously.

Management risk is A series procedures and methods applied company in identify risk , measure risk , monitoring risk , as well as play a role as components that can implemented by Banking in effort control the risks posed . Bank Indonesia determines minimum requirements for implementation management General Bank risk in BI Regulation No. 11/25/PBI/2009.

LITERATURE REVIEW

Credit

Credit own cognition as a loan money paid in a way installments on the amount that has been determined and permitted by the bank or institution others . Credit alone is A facility finances provided to individuals and company in frame purchase a returned product in a way installment based on term the time that has passed set at the beginning agreement credit , as well as has agreed imposition flower as well as appropriate guarantee with ability and capability as well as equivalent with the nominal amount borrowed . In general , the distribution of credit follow principles like *character, capacity, capital, collateral, and conditions of economics* .

Credit (KUR)

KUR is a working capital or in the form of investment capital provided to the business micro , small, medium and cooperatives in the field that is classified productive still Not yet can get banking facilities , with ceiling credit until with Rp. 500,000,000 (export) and guaranteed by the institution guarantor (Rahayu , 2019). While People's Business Credit is defined as capitalization Work and investment to debtor in form individuals , businesses , organizations , and gathering business productive others who have not own collateral adequate additions , to KUT in Article 1 Paragraph 1 of the Coordinating Ministerial Decree Republic of Indonesia Economic Law Number 1 of 2023 concerning Guidelines Implementation of KUR. Coordinating Minister The Indonesian economy states that KUR distributors consist of from Financial Institutions or Cooperatives that have appointed . This institution divided on government , supervisors (OJK and BPKP), guarantors (PT Jaminan Indonesian Credit , PT Insurance Indonesian Credit (Persero), and others), and distributors (banking). There are at least three The types of KUR distributed by KUR distributors are : micro , small , placement power Indonesian work , and special .

Risk Credit

Article 1 Paragraph 17 of the Regulation of the Minister of State-Owned Enterprises of the Republic of Indonesia No. PER-5/MBU/09/2022 defines risk as a condition , event or A future events that are not own certainty as well as own impact on objective strategic company . Financial Services Authority define risk as in Article 1 Paragraph 2 in POJK Number 18/POJK.03/2016 as potential loss consequence the occurrence a incident certain . More continued Article 4 states that Risk Credit is potential existence problems caused consequence absence ability from other party to pay off obligation payment to creditors , risk credit consequence failure business borrower , risk concentration credit , counterparty credit risk, and related with settlement risk.

Management Risk

Management risk is implementation from A function party management in countermeasures risks faced by individuals and a group business with carry out identification risk , measurement risk, monitoring , and control . Activities management risk covers planning , organizing , compiling, coordinating and supervising (evaluating) the handling program that has been prepared. Management Risks in Commercial Banks set up in POJK No. 18/POJK.03/2016. Where, Commercial Banks at least own the following four (4) pillars :

1. Supervision active by the board of commissioners and directors
2. Policies , procedures , and upper limit setting management adequate risk
3. Have a process of identification , measurement , monitoring and control Risks , as well as system information Management Adequate risk
4. System comprehensive internal control

Credit Problematic (Non-Performing Loan)

It is payment installment bad credit or stuck so that potential For No paid . Non-performing loan (NPL) is indication from smoothness payment credit as well as is runway calculation risk credit , where based on Bank Indonesia provisions , general banks must guard NPL percentage below 5%. Risk credit can cause loss on KUR distributors (banking) resulting from No fulfillment obligation debtor . NPL calculation based on formula following This :

$$NPL = \frac{\text{Kredit Macet} \times 100\%}{\text{Total Kredit}}$$

RESULTS

Management Division Risk

At Bank X, Management Risk own not quite enough answer as well as authority in determine policy related Bank risk in general macro (overall), where the management division risk will determine the Bank's risk appetite, risk tolerance, and risk limits. Management Division Risk own role as a second line of defense with own role in to form policy management risk at Bank X on a macro level.

Credit Risk Division

The Credit Risk Division functions as a work unit that participates as well as in do identification as well as evaluation on risk credit from candidate debtor together with the Area Officer from the work unit Business Credit Commercial . Credit Risk applies the four eyes principles in do his duties , where when AO does analysis to aspect business than debtor , Credit Risk will do analysis from corner risk credit from KUR distribution until with KUR disbursed , where use evaluation on seven (7) aspects , namely : aspects finance , aspects legal , aspect economic and social aspects technical and operational aspects management , aspects culture , Work unit This shared become two , namely those in charge as proposer , where together with work unit business do analysis as well as do submission on provision of KUR to prospective debtor , along with as the usual breaker is at in hand head of credit risk, in charge in agree or reject disbursement of KUR to debtors .

Business Division - Credit Commercial UMKM

Distribution People's Business Credit in general direct handled by the UMKM section on credit commercial . Every branch as well as capem own Area Officer (AO) staff and Credit

Recovery respectively, who have function as a risk taking unit (first line of defense). AO is a work unit that will Work The same with the credit risk work unit within do analysis on risk credit to the candidate debtor .

AO does evaluation on candidate debtor with using 5C (*Character, Capacity, Capital, Collateral, and Condition of Economy*) AO also plays a role as consultant for debtor in effort increase business that is run debtor . AO will do supervision of debtors during Still be at the level collection 2 (< 120 days). Temporary that , if credit has enter in realm credit problematic , namely on collection 3, Credit Recovery or team rescue credit will operate its function in continue the settlement process credit , can with Keep going do billing , auction collateral , do lawsuit simple , or bring case to prosecutor's office . Work unit businesses placed at the Head Office have function as maker policy along with carry out monitoring of work units at branches and sub-branches . So that the work units business commercial UMKM in the office center classified as second line of defense in its role in management risk .

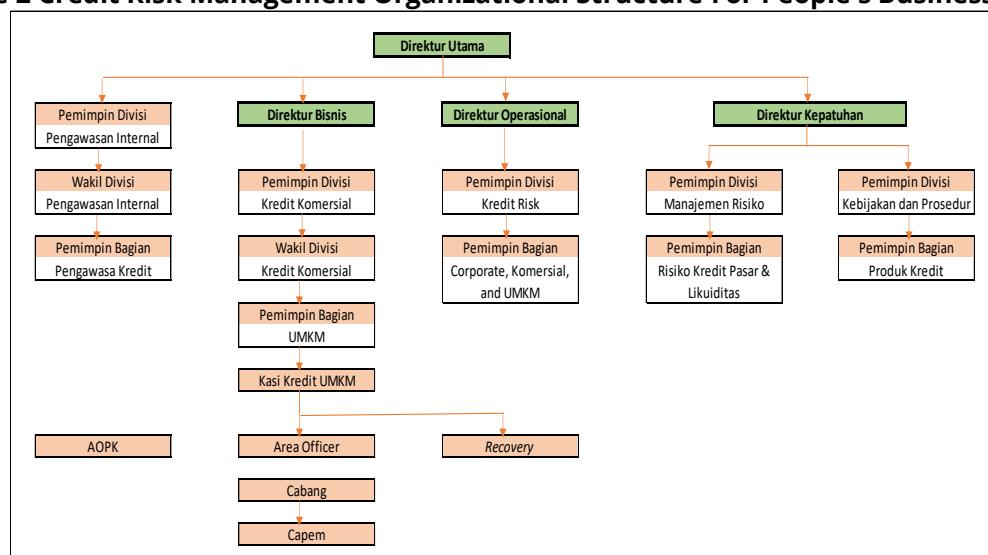

Administration Operational Reporting Credit (AOPK)

AOPK work units have function in do checking and data collection condition candidate debtor through system namely SLIK OJK before AO continues with do analysis . AOPK also plays a role in conduct an appraisal of collateral from candidate Small KUR debtors .

Internal Audit Division

Internal audit has role in do monitoring and evaluation from ongoing A activities in the organization , and including inside it ensure that management risk has implemented with good and has been follow established policies . The Internal Audit Division is based on POJK No. 1/POJK.03/2019 concerning Function Implementation of Internal Audit in Commercial Banks with carry out evaluation risk in a way comprehensive (Robust Risk Assessment).

Source : processed writer

Management risk applied to risk credit on KUR distribution is assessed Already Enough effective and adequate , where Bank X has own structure managed organization with good , policy management that has customized with need along with conditions , staff at the level branches , and at the level leader own adequate understanding on management risk on risk KUR credit , as well as own standards and indicators based on the Financial Risk Rating (FRR) in determine decision termination credit . Besides that , Bank X has to reserve People's Business Credit worth 100% of what is disbursed as well as insure product This in effort minimize possible losses can caused by credit congested or problematic . Bank X has also have SOPs that can become guide for work units that are down spaciousness as in Branches and Capem . Supervision and monitoring are carried out in a way periodic in accordance the provisions that are formed and work units give encouragement for perpetrator business (debtor) in operate his efforts .

CONCLUSION AND SUGGESTIONS

Can concluded that Bank X in Bengkulu Province has apply management sufficient risk adequate . Where the staff along with leader own the necessary understanding and qualifications in operate his duties , have standards and references in do analysis to risk credit , have structure clear organization and adequate governance , as well as results analysis show that Management Risk on risk KUR Bank X credit has fulfil assessment of the five (5) pillars of RMM at tier-3.

Mitigation performance Bank X's risk is assessed Enough adequate with supported by Non-Performing Loans which are still is at under threshold limits . However there is constraint related with use technology , where Bank X carries out identification on risk credit Good in a way aspect risk and aspect business manually . Bank X has not own a system that can do calculation , so that Still can it is said results analysis Still in a way subjective .
